

Position: Dean – School of Mechanical Sciences

Employer: Rathinam Technical Campus

Job Summary

The Dean of the School of Mechanical Sciences will be the academic leader responsible for the efficient operation and advancement of the Mechanical Engineering, Mechatronics Engineering, Agricultural Engineering and Biotechnology Departments. They will prioritize student placement training and engagement, while also maintaining discipline and oversight of technical activities to foster a productive learning environment within the departments.

Key Responsibilities

1. Academic Oversight

- The Dean will provide leadership and strategic direction to ensure the effective functioning of the aforementioned departments. This includes curriculum development, program quality, and academic excellence.

2. Student Placement Training and Activities

- The Dean will play a crucial role in overseeing students' attendance for placement training programs. They will work to ensure that students have access to resources and support necessary for successful placement in the job market.
- The Dean will monitor and coordinate placement-related activities, collaborating with Placement Department and Industry partners to facilitate job placements for students in the School of Mechanical Sciences.

3. Student Discipline

- Ensuring a conducive learning environment, the Dean will oversee and enforce student discipline within the School of Mechanical Sciences. This may involve addressing academic misconduct, behavioral issues, and adherence to institutional policies.

4. Attendance Monitoring

- The Dean will be responsible for tracking and addressing student attendance, ensuring that students attend classes and related activities as required for their academic and professional development.

5. Technical Activities

- The Dean will also supervise and support the conduct of technical activities within the departments, such as workshops, seminars, hackathons, and research projects, to enhance the students' technical skills and knowledge.

6. Academic Policy Development and Implementation

- As the Dean, one of the primary responsibilities is to develop and implement academic policies, programs, and curriculum that align with industry standards and accreditation requirements.
- This involves designing courses that are relevant, up-to-date, and meet the needs of the job market, ensuring that students receive a quality education that prepares them for professional success.
- Additionally, the Dean collaborates with faculty members to ensure effective implementation and continuous improvement of these academic initiatives.

7. Faculty Requirement Submission Process

- Deans submit faculty requirements to the Principal for the department to address staffing needs and maintain the department's academic excellence.
- The process involves assessing faculty workload, identifying vacancies, and justifying the need for new faculty based on factors like student enrollment and research projects.
- Once approved, the recruitment process begins to find suitable candidates for the faculty positions.

8. Faculty Subject Allocation and Workload Submission Process

- Deans allocate subjects to faculty members based on their expertise and qualifications, and upon approval from the Principal, the faculty members submit their respective workloads to the academic office.
- This process ensures a well-balanced and organized distribution of teaching responsibilities before the commencement of classes.

9. Timetable Submission Process

Before the commencement of classes, Deans submit the class and master timetables to the Principal for approval, ensuring they adhere to the specified timing requirements.

10. Course Material and Resources

Before the commencement of classes, Deans verify the Lesson plan, course material, Question bank, video links, and lab manuals with benchmark readings to ensure the content meets the required standards and is ready for use during the course.

11. Faculty Peer Review Process for Surprise Class Visits

- In the Faculty Peer Review process of surprise class visits by Dean, faculty members undergo unannounced classroom evaluations to assess their teaching performance.
- These surprise visits aim to provide constructive feedback, promote teaching excellence, and ensure continuous improvement in the quality of education delivered by the faculty.

12. Classroom Observations

- In the Class Rounds conducted by the Dean, the faculty members' teaching performance is observed during the first hour, after the break, and after lunch.
- These periodic observations aim to assess teaching methodologies, student engagement, and overall classroom dynamics, fostering a culture of continuous improvement and maintaining teaching standards within the department.

13. Student Support

- Address student concerns, grievances, attendance and disciplinary matters in collaboration with Director – Student Affairs.
- Facilitate Core training, co-curricular and extracurricular activities to enhance students' overall development.

14. Faculty Development

- The Dean plays a pivotal role in encouraging faculty members to participate in professional development activities, research endeavors, and seek patents and publications. This support fosters a culture of continuous learning and promotes faculty members' career advancement and contributions to academia and innovation.
- To create a thriving learning environment, the Dean facilitates workshops, seminars, Faculty Development Programs (FDP), and conferences, providing opportunities for faculty to enhance their teaching skills, share knowledge, and collaborate with peers. These initiatives promote intellectual growth, networking, and knowledge dissemination within the department.
- Dean provides mentorship to faculty members for tutoring.

15. Research and Innovation

- Through the signing of Memoranda of Understanding (MOUs), the Dean actively collaborates with industry partners and research institutions to foster meaningful research collaborations and explore funding opportunities.
- These established connections provide faculty members with access to valuable resources, expertise, and funding, empowering them to undertake impactful research projects that bridge the gap between academia and industry.
- As a result, these endeavors contribute to advancements in the field and address real-world challenges

16. Document Verification and Submission Process

- Dean verifies and consolidates various student-related data, including attendance records, logbooks, master attendance, proctorial cards, course files, department's academic performance and Examination results.
- Once reviewed and approved by the Dean, these records are then submitted to the academic office for further processing and official documentation, following approval from the Principal.

- This comprehensive procedure ensures accurate and up-to-date student information is maintained, contributing to effective academic management and administrative operations.

17. IQAC Related Documents and ERP Details

- In this process, the Dean verifies the relevant documents and files related to the Internal Quality Assurance Cell (IQAC) and Enterprise Resource Planning (ERP) system.
- After thorough verification, the Dean submits the approved materials to the appropriate authorities, ensuring compliance with quality standards and efficient management of institutional data and resources to be submitted and get approval from Director IQAC.

18. Departmental Budget Management and Resource Allocation

- Dean is responsible for managing departmental budgets, resource allocation, and overseeing infrastructure and laboratory requirements.
- This entails careful planning, efficient allocation of funds, and ensuring that the necessary resources and facilities are available to support the academic and research needs of the department effectively to be submitted and get approval from Head office affairs.

19. Alumni Relations

- The Dean takes an active role in fostering positive relationships with alumni, emphasizing their importance in supporting the department's initiatives.
- By encouraging alumni involvement and mentoring current students, a strong and supportive network is created, benefiting both the department and its students in their personal and professional growth.

20. Promoting Community Outreach and Social Responsibility

- The Dean plays a vital role in promoting the department's active engagement in community outreach and social responsibility initiatives.
- By encouraging faculty and students to participate in meaningful activities that benefit the local community, the department strengthens its connection with society and contributes positively to the greater good.

21. Departmental Meeting Management and MOM Submission

- Dean organize regular departmental meetings for faculty members to discuss important matters, following the discussions in Deans meetings.
- After each meeting, the Dean prepares Minutes of Meeting (MOM) summarizing the key points and decisions made, which are then submitted to the Internal Quality Assurance Cell (IQAC) and Principal for documentation and review.
- This ensures effective communication and transparency in departmental affairs, contributing to the overall quality enhancement of the academic institution.

22. KPI

- In this process, the Dean conducts monthly verification and evaluation of faculty Key Performance Indicators (KPIs).
- After assessing individual faculty KPIs, the Dean consolidates the department's faculty KPI details and submits them to the academic office.
- This ensures ongoing monitoring of faculty performance and contributes to overall academic excellence within the department.

23. KRA

- Once a year, the Dean verifies and evaluates the faculty's Key Result Areas (KRA). After assessing individual faculty KRAs, the Dean consolidates the department's faculty KRA details and submits them to the academic office.
- This annual evaluation process ensures a comprehensive assessment of faculty performance and contributes to the department's continuous improvement and success.

Qualifications and Requirements

- A Ph.D. (or) Master's Degree in a relevant engineering discipline.
- Significant teaching and research experience in the field of engineering.
- Previous administrative or leadership experience in an academic setting.
- Strong interpersonal and communication skills to effectively collaborate with faculty, staff, students, and external stakeholders.
- A vision for the department's growth and development in line with the college's mission.
