

Roles and Responsibilities

Mr. Mukuntharaj C

Assistant Professor/ Experiential Learning

Rathinam Technical Campus

Reporting to Mr. Gajendran P – Head School of innovation and Design

D.O.J.: 04.06.2025

Academic and Teaching Responsibilities

- Continue handling **MAT and CAT classes** for core Electronics and allied courses with improved outcome-based teaching methodologies.
- Enhance student learning through:
 - Concept-based and application-oriented teaching
 - Problem-solving sessions
 - Industry-oriented practical examples
 - Continuous academic mentoring

Laboratory and Technical Development Responsibilities

- Serving as **In-charge of CHIP Hub**, an initiative aimed at training students in the field of **VLSI Design and Semiconductor Technologies**. As part of this initiative, successfully obtained approval for the procurement of **AMD Kria FPGA Development Boards**.
- **Certified QNX Trainer** to handle/support Advanced Embedded System (**QNX RTOS**) course.

Institutional and Administrative Support

- Supporting various **inspection and compliance activities** related to the **AICTE IDEA Lab** and departmental laboratories.
- Contributing to the effective functioning and technical development of departmental laboratory infrastructure.

Student Mentoring and Competitive Preparation

- Currently mentoring a student batch for the **ISRO Drone Challenge 2025**, which has been **shortlisted for the next round**, with final round preparation in progress.
- Continuously mentoring students to participate in prestigious national-level competitions and innovation programs such as:
 - Arduino Contest
 - Shiksha AI

- National-Level Hackathons
- Continue mentoring students for:
 - Smart India Hackathon (SIH)
 - ISRO Drone Challenge
 - National-Level Hackathons
 - Arduino Contest
 - AI-based innovation challenges
- Strengthen student participation in interdisciplinary projects, competitions, and innovation-based activities to improve institutional achievements.

Skill Development and Technical Training

- Organize and conduct workshops, bootcamps, and hands-on training sessions in:
 - Embedded Systems
 - Microcontrollers and IoT
 - Computer Vision and AI Applications
 - VLSI and FPGA-based Design
- Expand **CHIP Hub activities** by initiating structured training in:
 - FPGA Development
 - ASIC/VLSI Design Flow
 - Semiconductor System Design

IDEA Lab and Institutional Contributions

- Continue contributing as **Tech Guru of AICTE IDEA Lab** by:
 - Conducting technical training programs
 - Supporting student innovation and prototyping
 - Assisting interdisciplinary project development
- Support laboratory enhancement, inspection activities, and infrastructure development initiatives across the department.

Professional Development

- Continue upskilling in advanced technologies such as:
 - Real-Time Embedded Systems
 - QNX RTOS
 - VLSI and Semiconductor Design
 - AI-driven Embedded Applications
- Contribute to academic excellence through student mentoring, technical activities, and innovation-driven initiatives.
